SUMMARY

Product designer with nearly a decade of experience shipping digital products at Philips and Samsung, and an Ed.M from Harvard (May 2026) focused on Learning Design, Innovation & Technology. Interested in EdTech, children's media, museum education, and learning space design — work that uses technology to deepen a child's connection to the real world rather than replace it.

EDUCATION

Harvard Graduate School of Education

M.Ed., Learning Design, Innovation & Technology

Cambridge, MA

June 2025 - May 2026

- Relevant Focus: Emotional Development, Playful Learning, User Experience Design for Children, Imaginative Thinking
- Cross-registered at MIT, Media Arts & Sciences (Feb-May 2026)
- Volunteered at Radcliffe Child Care Center, Cambridge — classroom observations directly informed independent concept projects (Cubism Through Shadows, Foundtale, Inkling Isle)

National Institute of Design

Bachelor's Degree, Graphic Design

Ahmedabad, India

2013

SELECTED INDEPENDENT PROJECTS

Cubism Through Shadows — Concept Study, Field-Tested with Children

- Designed and facilitated a museum-based activity teaching children to see through an artist's perspective, developed through two in-person playschool sessions and grounded in learning and museum education coursework.

Foundtale — Research-Backed Concept, Pre-Prototype

- Designed a physical storybook and companion app concept for parent-child pairs, built from a 54-parent survey and coursework in developmental psychology; led research, synthesis, and interaction design solo.

Inkling Isle — Concept Study, Pre-Prototype

- Designed a tablet-based creative storytelling concept for ages 4-8, where children photograph everyday objects and reimagine them as characters, grounded in classroom observation and research into symbolic play and agency.

EXPERIENCE

Philips

Visual Designer

Bengaluru, India

November 2021 - February 2025

- Contributed to PIC iX, Philips' enterprise patient monitoring system used in critical care hospitals globally — recognized with a Red Dot Award in 2023.
- Owned visual design for three core clinical modules, translating complex medical data into clear, accessible interfaces for clinicians with no prior medical background.
- Co-led the visual direction for a company-wide icon library revamp, establishing a new design language adopted across Philips product teams globally.
- Managed an enterprise design system of 5,000+ assets across device types and screen sizes, reviewing work from designers across global teams.

Itilite

Lead UX Designer

Bangalore, India

September 2020 - March 2021

- Designed a data visualization feature translating complex travel expense data into decision-ready visuals for company leadership.

- Led UX concept and ideation for a real-time employee travel tracking feature, designed during COVID-19 to help organizations monitor employee safety and location.
- Proposed unsolicited UI improvements to the core product design language, acknowledged and kept under consideration by leadership.

Aurigo Software Technologies

India

UI/UX Designer 2

August 2019 - August 2020

- Joined as the first and only designer at a mid-size SaaS startup; independently developed domain understanding and led a full redesign to bring visual and structural coherence to a product built through years of developer-led feature additions.
- Built a complete design system from scratch — UX flows, color palette, icon style, and component guidelines — while self-teaching Figma during delivery.
- Presented and secured design approval directly from the CEO, CFO, and senior leadership.

Aavaran — Echoes of Rural India

Udaipur, India

Freelance Designer (NGO, Printing Studio)

2016 - 2017

- Designed business collateral and proposed website design improvements, working closely with artisans practicing traditional blockprint craft.

Design Doodle

Greater Surat Area, India

Design Educator (Private Coaching Center)

2016 - 2018

- Taught visual design fundamentals to 60+ students preparing for entrance exams at NID, NIFT, and MIT Institute of Design.

Samsung Electronics

India

Visual Designer

February 2014 - May 2015

- Selected within the first month of joining to work on-site in Korea with Samsung's principal design team on Kids Mode, one of Samsung's flagship child-focused digital experiences.
- Owned visual design and guideline maintenance for specific Kids Mode modules during Phase 2 development.
- Participated in the conceptual redesign of the Kids Mode main character alongside senior Korean designers.
- Designed a built-in template selected and shipped with the launch of the Samsung Z3 mobile device in India.

SKILLS

Learning Experience Design, Children's Digital Experience Design, Museum Education, UX/UI Design, Design Systems, Illustration, Figma, User Research, Visual Design
